Post-Operative Nail Procedure Instructions (Dr. Kaczander)

1. Keep the bandage dry for 24 hours, then soak the foot twice a day (for 10 minutes) with one packet of Pediboro Powder dissolved in warm water.
2. A small amount of bleeding may be noted through the bandage.
3. Soak with the dressing on and let it air dry.
4. Continue the soaks for three days.
5. Remove the bandage on the third day and replace it with a bandaid. Stop the soaks. Cut the bandage on the bottom of the toe with scissors.
